

TAURUS 3 RING SAW

Create Intricate Curves, Designs and Shapes as well as straight lines in Tile, Stone, Plastic and Glass. Glass tiles cut perfectly. Rigid blade does not waiver. Makes straight and radius cuts. Smoothest edges possible. The Taurus 3 Ring Saw does what no other saw do. Includes entertaining instructional DVD. This saw will save you time and money while opening up a new worlds of creativity!

The entire working part of the saw snaps out of the water bath and contains its own water so that it can be used as a portable hand saw. This feature also makes the saw very easy to clean. Much quieter. Less than half the noise of other saws. Your ears will love it. Large work surface. Bigger pieces are a breeze. Long lasting parts. Extreme extended life means virtually no maintenance. Built in , flipup face shield. Protects you from any stray particles. Greater blade exposure plus a built-in intense bright white light surrounds the blade while the saw is on. This makes seeing your work easier every time. Constructed with metal reinforced polycarbonate. It's super strong and stiff. 2 years warranty. We back you up with the best customer service. Cuts in all directions. Wherever your material touches it cuts. Does inside and outside curves. Makes cutting all kinds of intricate shapes easy. Grinds as it cuts. Leaves a smooth edge. Requires little or no finish grinding. Blades last many times longer than band or jig saw. What you save in the cost of the blades will pay for the saw in a very short time.

The Taurus 3 Ring Saw also :

CUTS IN ALL DIRECTIONS. There are diamonds all around the standard blade not just on the edge. Wherever your materia touches, front, back, left or right (360 degrees), it cuts. You will be able to cut all shapes faster with total precision. **GRINDS AS IT CUTS** leaving a smooth edge that requires little or no finish grinding. This will give you a very professional look while saving time and money. **CUTS UNDERWATER WHILE YOU STAY DRY.** Designed so that the water is deposited around the entire blade continuously. The water stays on the blade and will not fly off into your face or surrounding area. The result is a cooler, longer-lasting blade. The blade will not load up on glass, rock, soft metals and plastic. The debris from your cutting is suspended in the water that goes into the reservoir, leaving you a clean work surface. **LASTS MANY TIMES LONGER** than other diamond-coated saw blades. The continuous cooling of the ring blade and heavy-duty construction give you many times the life of band or jig saw blades.

SPECIFICATIONS

Case Size: 18" wide x 16" deep
Table Size: 18" wide x 12" deep
Weight: 14 lbs.
Motor: 1/5 hp, 115 or 220 V, single speed
Blade: 5-3/4" seamless stainless steel ring
Lubrication: Water Pick-up, 6 liter reservoir
Throat Depth: 5-1/2" Throat Height: 1-1/2"
Upper Blade Guide Height: 1-1/2"

TYPES OF BLADES AVAILABLE FOR THE TAURUS 3 RING SAW

STANDARD BLADE Good for soft tile, marble and stained glass where a more intricate cut is required. This blade comes installed with the Turus 3 Ring Saw.

MEGABLADE The incredible blade that cuts curves and straight lines in tile, porcelain, granite, stone and thick glass. This is the strongest blade for the Taurus 3.

SEPARATING BLADE Same as the standard blade but this blade opens and closes so that you can cut a hole or design on the inside of your material as easily as you can on the outside. Just drill a hole and you're ready to go with no entrance cut.

SLICER BLADE Our thinnest blade. Cuts like a band saw except it will not bind. Also cuts forwards and backwards. Use it where a thin cut is desired.

SLIM BLADE Use where a narrower cut is desired. For tile and stone up to 1/4 inch thick, glass, non-ferrous metals such as a 12 gauge silver, copper, brass, etc.etc.

The slim blade and the slicer blade require a gentle touch.

ACCESSORIES

ACCESSORY KIT

It's equipped with helpful tools for complete any project, from cutting straight lines to perfect circles and precise angles. As added bonus the Accessory Kit comes with the new Taurus 3 DVD " Everything you wanted to know, but were afraid to ask". The Kit includes : Straight Edge, 30/ 60 degree Cutoff triangle, 45 degree Cutoff Triangle, Bevel Edge Maker, Circle Maker, Lamp Wedge.

SUPER SLICER

The Super Slicer is a device that gives you the ability to make repetitive, perfectly parallel, ultra thin cuts in any material that will clear the throat height of the saw, which is 1 1/2" in the Taurus 3. The Super Slicer has the ability to cut slices as thin as 1/16". Examples where it's useful are when cutting : Pattern Bars, Streamers, Millefiori, any other material that requires repetitive cutting.
